

Let's head to Dortmund for Intermodellbau!

Herpa will be there with five exhibition models!

In Dortmund, the world of model making springs to life – full of attention to detail, innovation, and inspiring encounters. The world's largest trade fair for model making and model sports will open its doors again from 16 to 19 April 2026.

Amidst the bright lights of the exhibition hall and the amazed looks on visitors' faces, we won't want to miss out. That's why we welcome you to our 4B12 stand in Hall 4. In addition to a selection of standard and special models, we also have a handful of exclusive trade fair models up for grabs.

In the emergency services sector, we might well inspire you with three different models continuing the series of fire engines from Dortmund and Lünen. The MTF 23 and MTF 24 complement the long list of models from Dortmund. The Mercedes-Benz swap body truck is the fourth model from the Lünen fire brigade, which is based in the North, not far from Dortmund.

Another limited edition trade fair model is the Ferrari F50, which, like last year's Mercedes-Benz EQG, is finished in yellow with black accents providing some family character.

The simple yet attractive push floor semi-trailer from the Wiemers haulage company in Dortmund, with its new Mercedes-Benz Actros ProCabin tractor unit, could mark the start of a new series to be continued annually at Intermodellbau in the future.

We look forward to some stimulating conversation with you at Intermodellbau in Dortmund in Hall 4 at Stand 4B12.
